- FREE HEALTH SCREENING -
APRIL 18TH, 11:00 AM – 5:00 PM

The 62-foot-long, medically-equipped Lions Health Screening Unit travels throughout Washington and Northern Idaho to give free health screenings at schools, county fairs, and other public events. These screenings for glaucoma, diabetes, high blood pressure, and sight and hearing loss are the key to interventions in potentially life-threatening health problems.

This year, the Lions Health Screening Unit will provide free screening for an estimated 30,000 patients, the vast majority of whom will be children. The Foundation's annual cost to operate the Lions Health Screening Unit is more than \$150,000. As more and more children and adults come to depend on these screenings, we would greatly appreciate your financial support.
